CABLE KIT NO. 219-0497

DESCRIPTION. This cable kit provides power fail and auxiliary function connector terminations for the Kepco Model RTW 300W Series switching power supplies. The kit consists of two cables, the power fail cable is one meter long, and has the power supply mating connector wired to one end, and unterminated wires at the other end (see Figure 1). The auxiliary function cable is 12 inches long, and has mating connectors that correspond to CN2 and CN3 of the RTW 300W power supply. The auxiliary cable is used for connecting two units in parallel.

NOTE:

W-R: -S (SIGNAL COMMON)
 W-O: RV (OUTPUT VOLT ADJUST)
 R: CB (CURRENT BALANCE)
 VT: +RC (REMOTE CONTROL)
 W-BR: -RC (REMOTE CONTROL)
