DESCRIPTION. Kepco KIT, Model DIN ECM-S contains a cover, a mounting plate with left and right mounting clips, and associated hardware (see Table 1) used to install ECM Series 16W power supplies on a DIN rail. The “S” suffix is for mounting along the short dimension (width) as shown in Figure 1. Outline dimensions are shown in Figure 5.

INSTALLATION

1. INSTALL MOUNTING PLATE. Attach the mounting plate to the power supply using the hardware supplied (see Figure 2). Install plate so that hole closest to edge is furthest from power supply terminals; and access holes are not obstructed by power supply.

NOTE: INSTALL PLATE SO THAT HOLE NEAREST TO EDGE IS FURTHEST FROM POWER SUPPLY TERMINALS, AND ACCESS HOLES ARE NOT OBFURCATED.
2. **INSTALL CLIPS.** Snap the two clips into the mounting plate holes (see Figure 3).

![Figure 3. Installing clips on mounting plate](image1)

3. **INSTALL POWER SUPPLY ON DIN RAIL.** To mount the power supply on the rail insert one end of both clips under one edge of the rail, then snap the other end of the two clips into place (see Figure 4A).

**REMOVING POWER SUPPLY FROM DIN RAIL.** While grasping the power supply with one hand, insert a screwdriver into the access holes provided and apply leverage towards the left as shown in Figure 4B to disengage each clip from the rail. Where mounting clips are close together, it may be necessary to apply leverage with two screwdrivers simultaneously.
