DESCRIPTION. Kepco KIT, Model DIN RTW-100L contains a mounting plate, two mounting clips and associated hardware used to install RTW 100 Watt Series power supplies on a DIN rail. This kit applies only to RTW models with the C Suffix (e.g., RTW 5-20KC) indicating covers are installed. The -100 suffix is for the 100 Watt Series. The “L” suffix is for mounting along the long dimension (length) as shown in Figure 1. Outline dimensions are shown in Figure 4.

INSTALLATION

1. INSTALL MOUNTING PLATE. Attach the mounting plate to the power supply using two screws, P/N 101-0468 (see Figure 3).

2. INSTALL CLIPS. First slide each mounting clip onto to the mounting plate, then secure in place using the hardware supplied (see Figure 3). The clips may be mounted with the release lever on either side to facilitate removal.

3. INSTALL POWER SUPPLY ON DIN RAIL. To mount the power supply on the rail insert one end of both clamps under one edge of the rail, then snap the other end of the two clips into place (see Figure 2A).

REMOVING POWER SUPPLY FROM DIN RAIL. While grasping the power supply with one hand, use a screwdriver to apply leverage towards the left as shown in Figure 2B to disengage each clip from the rail. Where mounting clips are close together, it may be necessary to apply leverage with two screwdrivers simultaneously.
