DESCRIPTION. Kepco KIT, Model DIN AK-1000S contain two preassembled mounting clips and associated hardware used to install AK-1000 Series power supplies, respectively, on a DIN rail. The “S” suffix is for mounting horizontally along the short dimension (width) as shown in Figure 1. Outline dimensions are shown in Figure 4.

INSTALLING KIT. Attach the preassembled mounting clips to the power supply using the hardware supplied (see Figure 3). The clips may be mounted with the release lever on either side to facilitate removal.

INSTALLING POWER SUPPLY ON DIN RAIL. To mount the power supply on the rail insert one end of both clips under one edge of the rail, then snap the other end of the two clips into place (see Figure 2A). If the DIN rail is mounted on a flat surface, the DIN rail must be raised at least 1.08 in. above flat surface to avoid interference during installation/ removal.

REMOVING POWER SUPPLY FROM DIN RAIL. While grasping the power supply with one hand, use a screwdriver to apply leverage towards the left as shown in Figure 2B to disengage each clip from the rail. Where mounting clips are close together, it may be necessary to apply leverage with two screwdrivers simultaneously.
